

Jay Bhatt

bbbaj2404@gmail.com | github.com/jay-a-bhatt

Skills

Languages: Python, C, C#, Rust, Kotlin

Technologies: Linux/Unix, Git, Virtualization, Docker, SQL (Microsoft, MySQL, SQLite), Jira

Experience

Pharmacy Assistant

March 2025 - Present

Ellerslie Pharmacy - Edmonton, AB

- Processed and filled prescription orders accurately under pharmacist supervision
- Operated pharmacy management software to maintain patient records
- Packaged and labeled prescription medications following strict regulatory guidelines
- Restocked pharmacy shelves and rotated inventory to prevent expired medications
- Assisted with technical issues with service computers, reducing costly downtime

Lunchtime Supervisor

April 2022 – Present

Jan Reimer School – Edmonton, AB

- Supervised classroom activities during teacher absences, ensuring a safe and engaging environment for students
- Addressed behavioral issues and reported concerns to senior supervisors.

Leader in Training Volunteer

May 2019 – September 2019

City of Edmonton – Edmonton, AB

- Led activities and crafts for children, enhancing their engagement and fun.
- Organized and cleaned the shack, maintaining accessibility to toys and craft supplies.

Councilor In Training Volunteer

April 2016 – September 2018

William Lutsky Family YMCA – Edmonton, AB

- Accumulated 300 hours of volunteer service, focusing on summer camps for children
- Assisted parents with concerns and ensured all children were involved in activities.

Projects

Fluid Simulation

github.com/jay-a-bhatt/Fluid-Simulation-hackED-2025

- Developed fluid simulation using Rust and WebGPU for interactive visualization during hackED 2025.
- Implemented fluid dynamics with PIC/FLIP algorithm for realistic behavior.

- Built responsive web application with custom controls for user interaction.
- Utilized WebAssembly for cross-platform compatibility and performance optimization.

Tutoring Android App

Private Repo

- Developed using Kotlin and SQL-based databases to manage tutoring sessions.
- Streamlined communication between tutors and students through a user-friendly interface.

Movie Rental Windows Program

Private Repo

- Created a WinForms application in C# that connects to an MS SQL server for movie rental management.

Machine Code VM Interpreter

- Developed a command line C program capable of interpreting and executing StunTel 80d201 machine code.

Education

Grant MacEwan University – BSc Computer Science Major + Biology Minor *2026 Expected*
Relevant courses (CMPT) – Software Engineering, Databases, Networking, Operating Systems, Human/Computer Interaction, Data Structures & Algorithms, Numerical Methods, Cryptography.

Relevant courses (BIOL) – Eukaryotic Cell Biology, Genetics, Evolution, Ecology.

W.P. Wagner High School – High School Diploma

June 2021
